<https://rateyourmusic.com/list/ExtendedPlay/a-chronology-of-witch-house>

Recently we discovered "Rate your music" website. This web allows you rank and create lists with your favorite singles, EP's or albums. And the most important thing allow you add releases and tag it with a music genre of your consideration.

Other important thing of RYM website is the option of can see the list of WH music releases per year. As a database of this genre. And the self users are the people who managed who enters and not in the category of WH music.

Through the years we have been seeing ramification and mutation of WH. Listeners started to consider and tag as WH another genres like "Emo Trap" or "Horrorcore" Mainly due to the influence of the label: "Haunted Mound". This style sounds very commercial and something more similar to "trap" or "phonk". But using deep bass synths and dense atmospheres.

Also some "Deconstructed Club" music recently has been tagged as WH. For have some ritual drums and glitchy noisy sound effects. This reminds a little to the music created by the artist "Astrosuka" for "Aural Sects netlabel years ago. The label "Hyperboloid Music" is one of the main faces of the IDM/Deconstructed club new face. Some old school WH artists also started to make a fusion on that direction: "Summer of Haze" and "Bogue"(ex Vagina Vangi) are some of the most relevant who changed their initial obscure style, for something more Futuristic and "Deconstructed".-

The years will continue passing and the genre will have more acceptable and less popular fusions. Maybe is decay or evolution? Nobody can tell us. The taste in music are so complex and different between music fans. But anyway witch house continue saying "hello, i'm here" in the multiple tags, influences, artworks, melodies of the current underground scene.
